REJUVENATOR LIGHT FACIAL

Studies Show Red Light

Stimulates collagen, a much-needed component of youthful looking skin. Collagen keeps skin firm and helps restore elasticity and minimize wrinkles and age lines. You won't want to miss how you can use light therapy to impact underlying facial muscles to regain strength and tone, while creating a more youthful appearance.

*The Results (*see studies on reverse side)

- No pain and no chemicals
- Increases the production of collagen and elastin fibers
- Firms aged and tired skin
- Smooths the skin and reduces wrinkles
- Reduces cellulite deposits
- More even skin coloration and complexion
- Increases moisture retention
- No negative side effects or burns
