# Light Emitting Diode Delivery

## LED evolved from Lasers

As light instruments, both low level lasers and LED delivery show effective results.

Harvard researchers have found advantages of LED delivery include

- No laser safety considerations
- Easy to use at home
- Ability to irradiate a large area of tissue or multiple areas of tissue at once
- Can go right on the skin, can even be worn.
- Economical

**LED photobiomodulation, shining LED light instruments on the body to create positive change, “is effective and here to stay.”**

# The Body Is A Living Photocell

## We Are Designed To Receive Light

1. Eyes - Reticular Activating System

2. Through the Skin - Transdermal  
From deep brain and bone.

3. In Our Field - Quantum Effect.

# Receiving through the Eyes

A single photon hitting the back of the retina lights up the brain.

We receive light through our eyes into our light meter, the pineal gland.

Light synchronizes us with our natural world and consciousness.

# The Pineal Gland

- Sleep Cycles
- Mood
- Hormones
- Intuition
- Memory
- Creativity
- Consciousness

# Harmonic Light is Meditative

“When pathways are clear, flowing and carrying light information factors, the internal parasympathetic system is in control.

Thus, light therapies are a priori forms of meditation & healing.”

Gary Buchanan -Sonatherapy

# Reaching A Meditative State

## \* Effects of Meditation:

- On: genes associated with energy metabolism  
mitochondrial function  
insulin secretion  
telomere maintenance
- Off: those involved in inflammation

\*These effects were more pronounced and consistent for long-term practitioners.

- \* **IMPLICATIONS:** People who practice simple meditation aren't "just relaxing," they're experiencing "a specific genomic response that counteracts the harmful genomic effects of stress."
- \* **CONCLUSION:** "Do it for years," said researchers at the Benson-Henry Institute for Mind/Body Medicine at Mass Gen, "and then these effects are quite powerful in how they change your gene activity."

## **Transdermal Application**

**Light travels into the body to dramatically affect our performance & well being.**

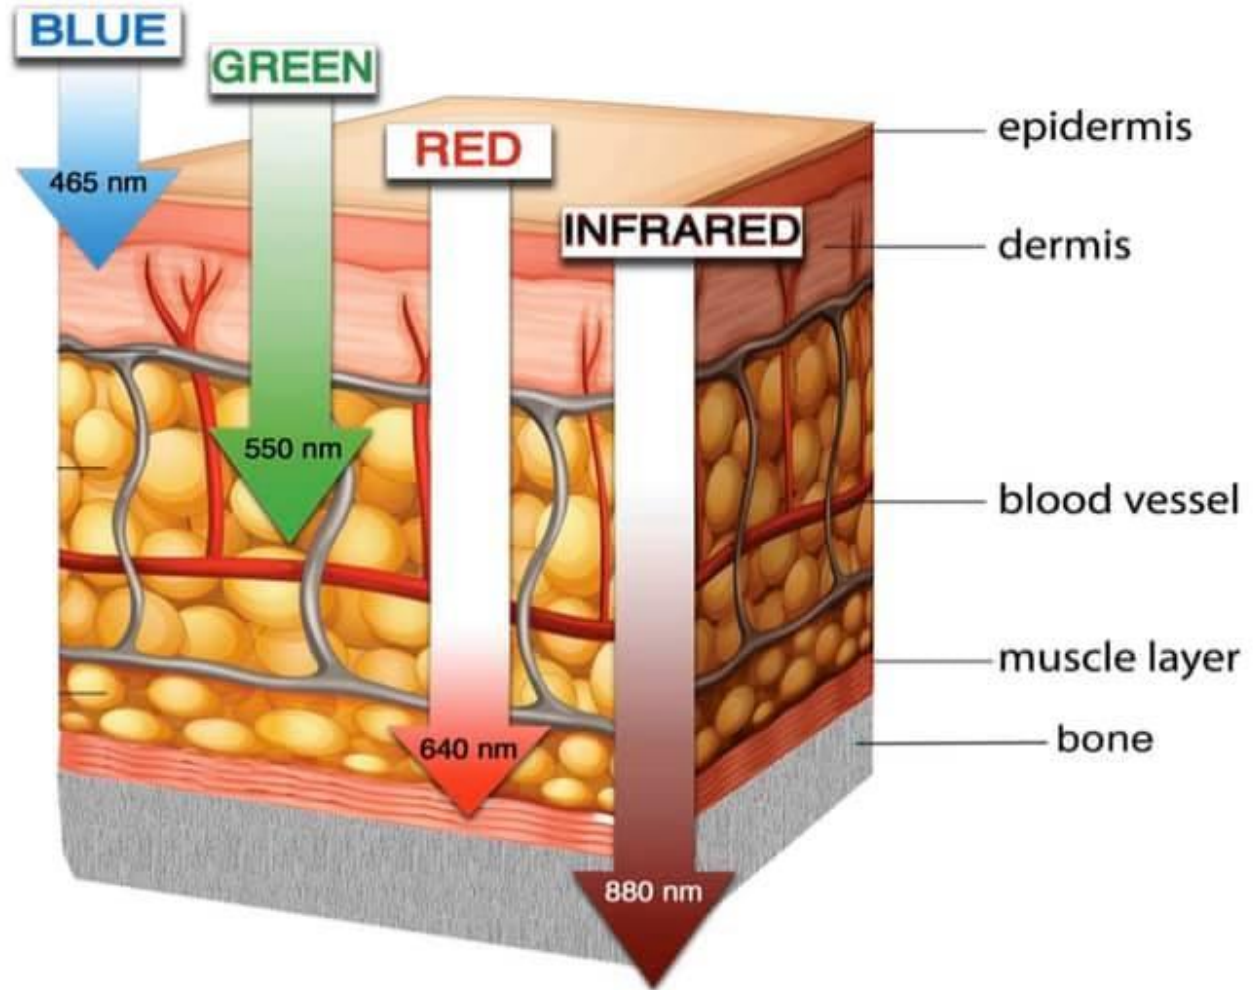

**Blue:** Studies show that it is cleansing and supports skin and liver health, collagen, Mood calming, reduces inflammation, calms nervous system, Auto-Immune support, Anti-Pathogenic.

**Green:** Studies show that it comforts pain, lowers inflammation, enhances immunity, long lasting stress reduction, Anti-infection. Great for Liver, Lungs, Thymus, Immune System.

**Red:** Studies show that it increases circulation, nitric oxide, production of ATP, promotes cell regeneration, aids in detoxing the cell and decreases inflammation and supports soft tissue, muscle including the heart and brain.

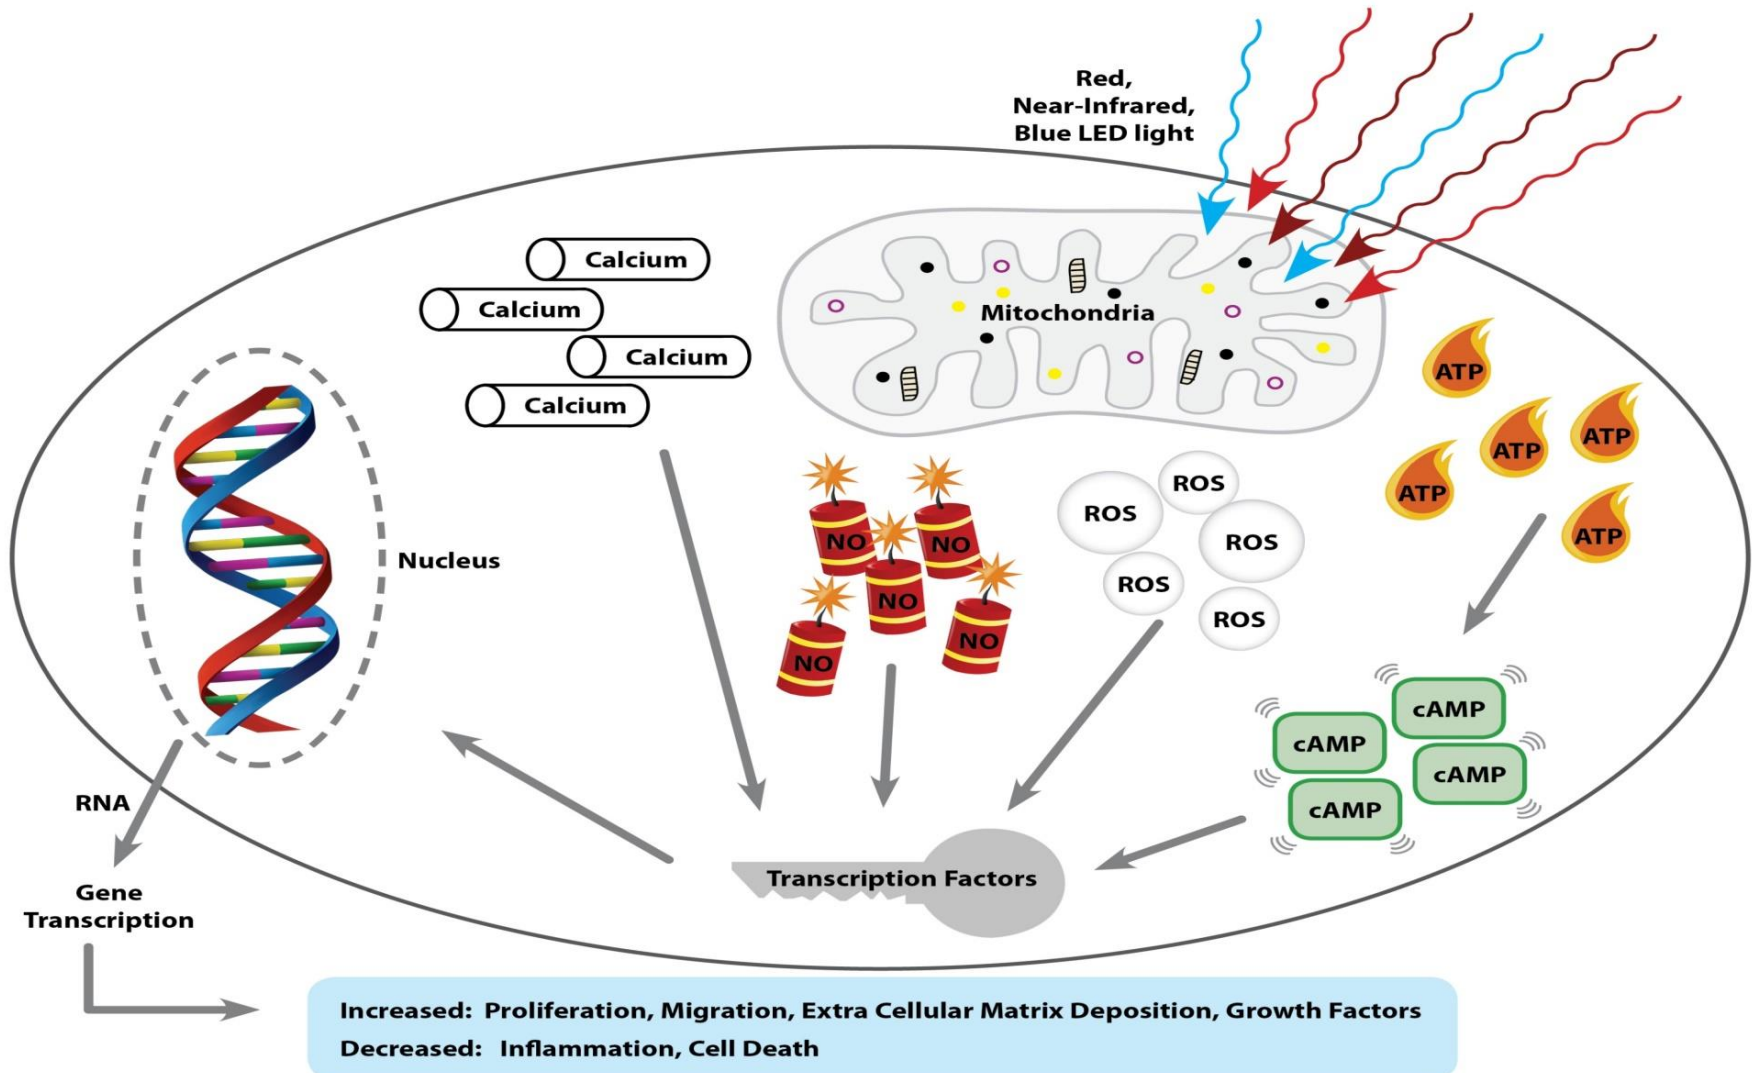

**Near Infrared:** Research shows that it supports hard and soft tissue, bones, joints, tendons, teeth. Increases the production of Nitric Oxide, reduces pain and inflammation, supports lymphatics and brain. Increases cell regeneration.

# Light & Energy Production

# LIGHT = The Ultimate Biological Nutrient

- Light donates photons to cells that **need** energy
- Photons increase the production of ATP (150%)
- Adenosine Triphosphate, or ATP, is the energy of the cell
- ATP energy governs 80-90% of the cells' activities

# Light & Oxygen

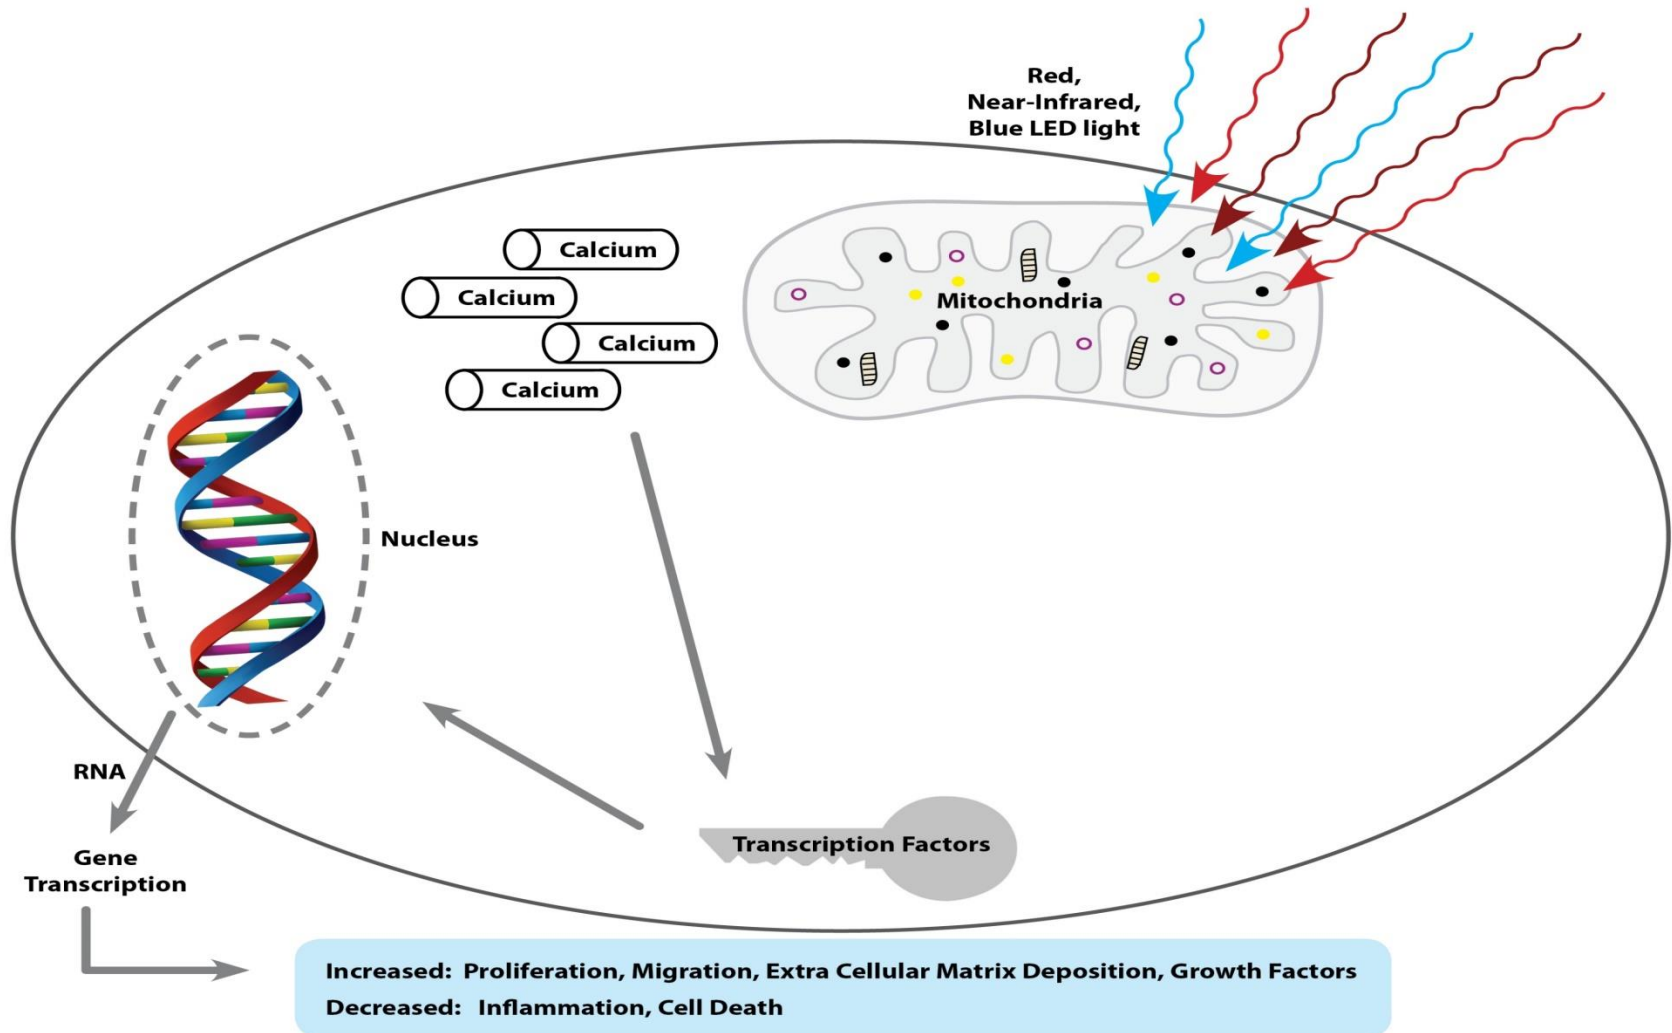

# Oxygen

- \* A cleaner that assists immune system, cell signaling and homeostasis – balance in the body.
- \* Too much ROS, Reactive Oxygen, can be damaging
- \* UV and excess Heat can create too much ROS.
- \* Applying the right light to the body “triggers the production of reactive oxygen species... without inducing DNA damage”

# Light & Circulation

# What *is* Nitric Oxide?

A signaling molecule produced in the endothelial cell linings along 100,000 miles of blood vessels and capillaries in the human body.

The Nobel Prize was awarded in 1998 for understanding its roles.

# Role Of Nitric Oxide

Decreases pain

Keeps blood vessels open, elastic and functioning properly

Lowers Blood Pressure

Increases Oxygen Levels Throughout The Body

Ensures Blood Flow To The Brain

Increases energy production

Stimulates collagen production

Defends Against Tumor Cells

Decreases Numbness

Increases Lymphatic Activity

Kills bacteria

Increases blood flow and prevents the build up of plaque in the arteries

# Studies Have Found That Nitric Oxide

- \* Protects against GI ulcers
- \* Protects against Alzheimer's
- \* Prevents male pattern baldness & E.D.
- \* Prevents early stages of Atherosclerosis
- \* Prevents vascular complications of Diabetes
- \* Improves heart function whether slower or faster by carrying oxygen in and carbon dioxide out.
- \* Stimulates body to release Human Growth Hormone (HGH)
- \* Improves Immune System Function
- \* Improves Cardiovascular Activity

*"I have come to see Nitric Oxide as the physical expression of Prana - your life force. It is the "Wow" molecule that continually resets our ability to connect body, mind, heart, and spirit. To activate this, we need to care for ourselves with plenty of sleep, exercise, life-giving foods, letting go of resentment, and opening up to affirmation and love."*  
{Christiane Northrup, M.D.}
